Porcelain laminate veneering is a common treatment strategy in dental clinics. They are one of the most challenging aspect of ceramic restoration. There is lack of knowledge and skill among general practitioners to fully appreciate the importance of tooth preparation, material selection, occlusion and cementation of the veneers. This course features a world – renowned speaker sharing his experience and knowledge about ceramic veneers along with a hands on session with interactive learning.

Learning outcomes;

- Understand one-appointment procedures for indirect and direct restorations for veneers
- To identify and diagnose the proper clinical indications and application of a pre-formed restoration technique without involvement of laboratory work
- To understand the advantages and benefits of minimally invasive treatment along with evidence-based methodology
- To apply the knowledge and skill to fabricate aesthetically and bio functionally acceptable restorations on posterior teeth

OBJECTIVES

To enhance the dentists' skill and knowledge to directly create the original shape and youthful luminance of a tooth, easily and perfectly in a single visit

TARGET AUDIENCE

- Private Specialists and General Dental Practitioners
- Ministry of Health Specialists and Dental Officers
- Dental Academic Staff and Students
