Collaborative Robots (Cobots) are designed to work independently with human in close proximity. With the advancement of technology, the role of Cobots are to support tasks to ensure safety and minimize injury. Low or repeating tasks can be replaced with robots/cobot, while human interactions with hazardous materials and risky processes such as handling chemicals, microbiology substances can be avoided and reduce contamination.

The workshop focuses into the future of doing things, and how to increase efficiency of work processes, improve repeatability and eliminate error in the area of healthcare.

TOPICS

- "Why and how collaborative robots will revolutionise how we do things"
- "Moving forward with COVID-19"
- Video presentations showcasing the various applications where Cobots have been successfully used
- Hands-on/practical session

OBJECTIVES

- To provide participants with the fundamental knowledge of robotics used in various applications.
- To encourage participants to embrace latest technologies towards IR4.0
- To offer active demonstration and hands-on cobot setup and application.
