Cochrane is a non-profit organisation that produces and shares high quality information about healthcare interventions worldwide. Its systematic reviews, called Cochrane Reviews, aim to inform healthcare decisions through high-quality research evidence published in the Cochrane Database of Systematic Reviews. The Workshop on Cochrane Systematic Review of Intervention Studies provides an overview of the Cochrane format, covering topics such as formulating questions, searching relevant studies, assessing risk of bias, and conducting meta-analysis through a mix of presentations and small group activities over three days.

OBJECTIVES

1. To introduce participants to Cochrane and the Cochrane Database of Systematic Reviews.
2. To provide skills and knowledge needed to register a title and prepare a Cochrane protocol and a Cochrane review.
3. To provide dedicated time in helping potential Cochrane authors in developing a title for a Cochrane review.
